- (b) Gragerious
- (c) Gregarious
- (d) Grigareous

13. **Choose the word which is nearly opposite in meaning to the word: Acrimonious**

- (a) Legal
- (b) Amicable
- (c) Cursive
- (d) Severe

Read the following passage and answer the questions 4 to 6

Despite the strong wilderness tradition of conservation biology, the past decade has seen a dramatic boost in the interest in urban biodiversity and its conservation, from both scientific and applied perspectives. Within any country, cultural traditions, financial resources, religious beliefs, and local environmental issues all will influence the goals of urban biodiversity conservation. Thus, to make successful choices among priorities, many local stakeholders will need to be involved. The problems of urban conservation are not insurmountable, but success requires a careful start. The first step is to answer the fundamental questions of why urban biodiversity should be conserved and what species assemblages or ecosystem functions are desirable and achievable in an urban setting. Without such an explicit starting point, progress will not be effective and limited conservation resources may be wasted.

14. Which do you think is most closely aligned with the author's stance?

- (a) The author believes that conservation of urban biodiversity is impossible to carry out in today's scenario.
- (b) The author is confident that conservation of urban biodiversity is easy and can be done effortlessly.
- (c) The author is hopeful that though conservation of urban biodiversity is difficult, it is still possible to implement.
- (d) The author is confused since the issue of urban biodiversity conservation is controversial.

15. According to the author, which of the following is indispensable for success of urban conservation ?

- (a) Having a clear and cautious beginning
- (b) to understand what species assemblages are desirable
- (c) to predict which ecosystem functions can be conserved in an urban setting.
- (d) having a strong wilderness tradition in society
