### SECTION-A: READING (20 MARKS)

**Q.1. Read the passage given below carefully and answer the questions that follow:**

Mount Everest, the world's highest peak at 8,848 metres, draws adventurers from all over. But the mountain on the Nepal-China border is fast becoming a dangerous place to visit even for the hardened mountaineer. The inherent risks were highlighted with a photograph by Nirmal Purja, a Gorkha ex-soldier. The image, which went viral and altered the manner in which people worldwide imagine what it is to scale Mt. Everest, showed a long queue awaiting a final tilt at the summit, with all the dangers such a wait holds. In the 2019 season, at least 11 climbers have died or gone missing,

including four Indians. Experts have been calling for Nepal to restrict the number of permits. It awarded a record 381 for this spring each fetching \$11,000 (climbing from the Tibet side is more expensive). On 22nd May, 200 climbers ascended the summit, a new record for a single day. Last year, 807 managed to reach the summit. In 2012, the United Nations estimated that there were more than 26,000 visitors to the Everest region, and this figure has grown manifold since then. Nepal officials argue that permits are not issued recklessly, and that jams such as this year's near the summit are on account of spells of bad weather, which result in mountaineers being compelled to reach the summit within a narrow time frame. Waiting in sub-zero temperatures at rarefied altitude can be fatal- this season's deaths were mostly due to frostbite, exhaustion, dehydration and lack of oxygen.

This year's drama has caught public imagination, as happened in 1996 when eight persons died in a single day amid an unexpected storm - events of and around that day were the subject of Jon Krakauer's bestselling book 'Into Thin Air'. The adventure industry that is built around the human desire to scale the peak has meant many amateurs take up the challenge, confident that support teams and specialized equipment will make up for their lack of adequate mountaineering experience. The fallout is that in case of a disaster not only are some of them unable to manage but they also hold up others, putting them in harm's way. The commercial operations have led to the Everest being called the world's highest garbage dump as many climbers discard non-critical gear, used oxygen cylinders, plastic bottles, cans, batteries, food wrappings, fecal matter and kitchen waste on the mountains. It is unlikely, however, that this season's tragedies will deter future summiteers, as the hypnotic lure remains intact. But the authorities must learn from this year's tragedies and work out an optimum number of climbers and strengthen safety measures.

**Q.2. Read the passage given below carefully and answer the following questions that follow. (10 Marks)**

Santiniketan embodies Rabindranath Tagore's vision of a place of learning that is unfettered by religious and regional barriers. Established in 1863 with the aim of helping education go beyond the confines of the classroom, Santiniketan grew into the Visva Bharati University in 1921, attracting some of the most creative minds in the country.

He developed a curriculum that was a unique blend of art, human values and cultural interchange. Even today, in every step, in every brick and in every tree at Santiniketan, one can still feel his presence, his passion, his dedication and his pride in the institution.

In 1862, Maharishi Debendranath Tagore, father of Rabindranath, was taking a boat ride through Birbhum, the westernmost corner of Bengal, when he came across a landscape that struck him as the perfect place for meditation. He bought the large tract of land and built a small house and planted some saplings around it. Debendranath Tagore decided to call the place Santiniketan, or the 'abode of peace', because of the serenity it brought to his soul. In 1863, he turned it into a spiritual centre where people from all religions, castes and creeds came and participated in meditation.

In the years that followed, Debendranath's son Rabindranath went on to become one of the most formidable literary forces India has ever produced. He wrote in all literary genres but he was first and foremost a poet. As one of the earliest educators to think in terms of the global village, he envisioned an education that was deeply rooted in one's immediate surroundings but connected to the cultures of the wider world.

Located in the heart of nature, the school aimed to combine education with a sense of obligation towards the larger civic community. Blending the best of western and

traditional eastern systems of education, the curriculum revolved organically around nature with classes being held in the open air. Tagore wanted his students to feel free despite being in the formal learning environment of a school, because he himself had dropped out of school when he found himself unable to think and felt claustrophobic within the four walls of a classroom. Nature walks and excursions were a part of the curriculum, special attention was paid to natural phenomena and students were encouraged to follow the life cycles of insects, birds and plants. The rural paradise of Santiniketan, Tagore's erstwhile home, has become a thriving centre of art, education and internationalism over the years.

**Current Road Accident Rates in Mumbai**

Mumbai, the bustling metropolis, is not only India's financial capital but also home to a growing concern – the alarming rise in road accidents. The city's rapid urbanisation, coupled with an ever-

increasing population and expanding vehicular traffic, has led to a surge in road mishaps. This issue is of paramount importance to comprehend as it directly impacts the safety and well-being of citizens.

The road accident rates in Mumbai have witnessed a disconcerting upward trend in recent years. The crowded streets, coupled with inadequate infrastructure and traffic management, contribute to the vulnerability of commuters. Factors such as reckless driving, speeding, and lack of adherence to traffic rules further exacerbate the situation.

One significant cause of road accidents in Mumbai is the sheer volume of vehicles on the roads. The overcrowded streets make navigation challenging, leading to congestion and increasing the likelihood of collisions. Additionally, the inadequate road infrastructure and maintenance contribute to hazardous conditions, with potholes and uneven surfaces posing threats to drivers and pedestrians alike.

Another contributing factor is the lack of awareness about road safety measures. Many motorists and pedestrians are unaware of the importance of following traffic rules, wearing helmets, and using seat belts. Educational campaigns and awareness programs become essential tools in addressing this issue, as they can instill a sense of responsibility among citizens and promote safer practices on the roads.

**2.1 Based on the reading of the above passage, answer the following questions. (1 x 6 = 6m)**

1. What contributes to the vulnerability of commuters in Mumbai?

Superstitions in India are deeply interwoven into the intricate tapestry of daily life, reflecting a fusion of ancient beliefs, cultural practices, and spiritual traditions. From the belief in auspicious timings for important events based on astrological charts to the precautionary measures taken to ward off the evil eye, superstitions are pervasive. The concept of 'Nazar' (evil eye) prompts the use of various charms like the Nazar battu or the use of black kohl to protect against its malevolent influence. जहाँ भी दो नदियाँ आकर मिल जाती हैं, उस स्थान को अपने देश में तीर्थ कहने का रिवाज़ है और यह केवल रिवाज़ की बात नहीं है, हम सचमुच मानते हैं कि अलग-अलग नदियों में स्नान करने से जितना पुण्य होता है, उससे कहीं अधिक पुण्य संगम स्नान में है । किन्तु भारत आज जिस दौर से गुज़र रहा है, उसमें संगम वे स्थान, वे सभाएँ तथा वे मंच हैं, जिन पर एक से अधिक भाषाएँ एकत्र होती हैं। नदियों की विशेषता यह है कि वे अपनी धाराओं में अनेक जनपदों का सौरभ, अनेक जनपदों के आँसू और उल्लास लिए चलती हैं और उनका पारस्परिक मिलन वास्तव में नाना जनपदों के मिलन का ही प्रतीक है। यही हाल भाषाओं का भी है। उनके भीतर भी नाना जनपदों में बसने वाली जनता के आँसू और उमंगें, भाव और विचार, आशाएँ और आशंकाएँ समाहित होती हैं, अतः जहाँ भाषाओं का मिलन होता है, वहाँ वास्तव में, विभिन्न जनपदों के हृदय ही मिलते हैं, उनके भावों और विचारों का ही मिलन होता है तथा भिन्नताओं में छिपी हुई एकता वहाँ कुछ अधिक प्रत्यक्ष हो उठती है । इस दृष्टि से भाषाओं के संगम आज सबसे बड़े तीर्थ हैं और इन तीर्थों में जो भी भारतवासी श्रद्धा से स्नान करता है, वह भारतीय एकता का सबसे बड़ा सिपाही और संत है।

हमारी भाषाएँ जितनी ही तेज़ी से जागेंगी, हमारे विभिन्न प्रदेशों का पारस्परिक ज्ञान उतना ही बढ़ता जाएगा। भारतीय लेखकों की बहुत दिनों से यह आकांक्षा रही थी कि वे केवल अपनी ही भाषा में प्रसिद्ध होकर न रह जाएँ बल्कि भारत की अन्य भाषाओं में भी उनके नाम पहुँचें और

उनकी कृतियों की चर्चा हो। भाषाओं के जागरण के आरंभ होते ही एक प्रकार का अखिल भारतीय मंच अपने-आप प्रकट होने लगा है। आज प्रत्येक भाषा के भीतर यह जानने की इच्छा उत्पन्न हो गई है कि भारत की अन्य भाषाओं में क्या हो रहा है? उनमें कौन-कौन ऐसे लेखक हैं जिनकी कृतियाँ उल्लेखनीय हैं तथा कौन-सी विचारधारा वहाँ प्रभुसत्ता प्राप्त कर रही है।

स्वस्थ भोजन की आदतें जीवन में बहुत ही महत्वपूर्ण हैं। हम जानते हैं कि यह अरुचिपूर्ण हैं, लेकिन यह इस तथ्य को कम सच नहीं बनाता है। सौभाग्य से, हम पहले से अधिक स्वास्थ्य के प्रति सचेत हैं। आज तो हममें से अधिकतर लोगों के लिए जिम, योग, नियमित व्यायाम जीवन का हिस्सा बन गया है। लेकिन फिर भी, जब हम खाने की अच्छी आदतों की बात करते हैं, तो हम भ्रमित हो जाते हैं। हम में से अधिकांश के लिए, भोजन शरीर को चलाने के लिए ईंधन होने के अलावा एक आनंद है। शरीर को जितनी जरूरत है, उससे ज्यादा खाना असामान्य माना जाता है।

स्वस्थ खाने का मतलब है कि आप अपने आहार में जंक फूड को हटाते समय अपने शरीर के लिए आवश्यक सभी पोषक तत्वों को संतुलित तरीके से शामिल करें। हर पोषक तत्व आपके शरीर को सुचारू रूप से चलाने में मदद करने में एक भूमिका निभाता है। उदाहरण के लिए, वसा और कार्बोहाइड्रेट लें, जो ऊर्जा प्रदान करते हैं। प्रोटीन जो एक अच्छी प्रतिरक्षा प्रणाली और क्षतिग्रस्त ऊतकों के पुनर्निर्माण के लिए मुख्य हैं और विटामिन आपके शरीर के विष-सुरक्षा के लिए उत्कृष्ट एंटीऑक्सिडेंट हैं। जब तक आप इन पोषक तत्वों को सही मात्रा में दैनिक रूप से नहीं लेते, तब तक आप अपने स्वास्थ्य के साथ न्याय नहीं कर सकते। स्वस्थ भोजन की आदतें शरीर को अच्छा प्रदर्शन करने और बीमारियों से दूर रहने में मदद करती हैं।
